

FOOD SAFETY POLICY

EUROMED S.A. has decided to commit to carrying out a “Food Safety Policy” aimed at the development of the company, the production, the marketing of legal and hygienically safe products. This policy is necessary to carry out the objectives and commitments that we want to achieve.

The obligation that Management of EUROMED, S.A. assumes is to apply the systems established in the procedures and instructions developed, in addition to verifying the applications by all personnel, periodically checking that the defined requirements are systematically applied and maintained over time.

To achieve these goals, the company will focus on the following commitments:

- Unite one's own image to high standards of food safety of products.
- Guarantee respect for current legal regulations that affect the food safety of manufactured products.
- Guarantee compliance with specifications and food safety requirements agreed with clients.
- Ensure a hygienically safe production process.
- Constantly defend the safety culture within the organization and promote the necessary resources for its correct implementation.
- Promote the use of the best available technologies in production processes.
- Actively promote internal and external communication channels with interested parties, suppliers, clients and authorities.
- Improve internal organization and raise the level of productive efficiency.

To ensure the effectiveness of the food safety system, Management is committed to periodically reviewing the applicability of this policy to take into account changes in environmental conditions and the information received.

This policy has been approved by the CEO of EUROMED S.A., Mr. Javier Roig Almirall in May 2024.
